

I claim

1. An encapsulation of a predetermined amount of toothpaste, not exceeding a single serving amount, whereby an individual can have a sufficient supply of toothpaste to brush their teeth with.
2. This encapsulation can be in any form or shape so that it creates a single serving host for the toothpaste and is made of an acceptable material to hold toothpaste.
3. An encapsulation that has a dispensing end that shall rupture when Squeezed from its opposite end , thus expelling its supply.
4. The supply amount of claim 1, may vary in volume, and should be about 1 serving size, such that there would not be waste of product, whereby urging the user to dispose of the spent encapsulation.
5. The said encapsulation of claim 2 embodied in a single use form having a hollow interior providing an acceptable cavity to hold a supply of toothpaste.
6. The encapsulation of claim 2, provides a delivery system for the purpose of obtaining a fresh supply of toothpaste for the user.
7. The encapsulation in claim 2 provides a means for the user to always have a germ free supply of toothpaste, substantially reducing the spread of disease caused by contaminated supplies of toothpaste .
